

State Revolving Fund (SRF)

During October, a Drinking Water Treatment Revolving Funded project, the Eastern Wyoming Public Service District's Mullens-Wyco Phase I, had a bid opening on October 20th. This project includes construction of a new regional water treatment plant and extensions to serve areas currently served by inadequate individual systems. The contractor's bids were considerably higher than the engineer's construction estimate, so staff is currently working with other funding agencies in order to achieve loan closure.

Staff has also worked with other loan recipients on projects for advertisements of bids, construction, and commitment of funds.

West Virginia Rural Water Association (WVRWA)

Contract with the WVRWA has been approved by WVDHHR and signed by WVRWA. WVRWA concluded duties defined in the past year's contract on October 31, and will now begin duties under new contract as outlined in their work plan.
